Roof Trolley

DEPENDING ON THE ROOF SPACE AVAILABLE AND BUILDING STRUCTURE :

Is used in buildings where longer outreaches are required. It allows reaching almost any required distance in the building façade profile. Traversing movement of the machine can be done on steel rails or on a concrete path.

Type 1 : With Winch on Trolley

Machine Slewing , Spreader Slewing , Telescopic Boom & Standard Cradle

TECHINCAL DATA

SAFE WORKING LOAD : 240 KG

SPEEDS

HOISTING : 8 TO 12 M/MIN
SLEWING : 8 M/MIN TIP SPEED
SPREADER SLEWING : 1.6 RMP
TRAVERSING : 8 M/MIN
TELESCOPING : 6 M/MIN

POWER SUPPLY

380 V--3PH--50HZ + EARTH & NETRAL

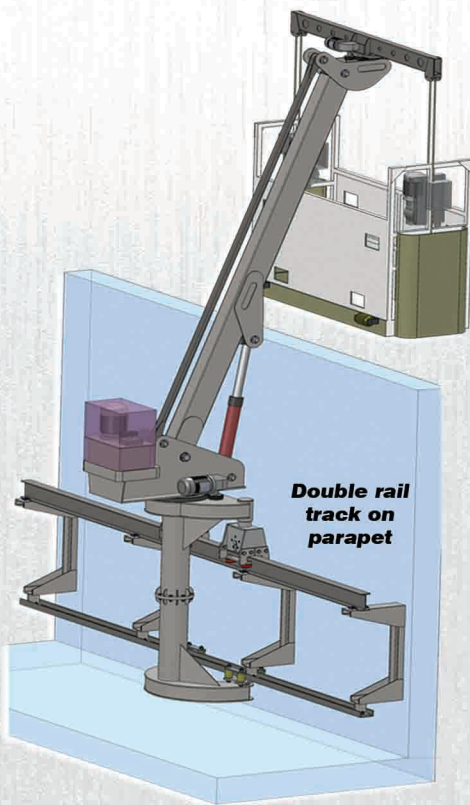

Mob : 0122 1351 915 - 0155 5986 690

Type 2 : With Winch on Cradle

Machine Slewing , Spreader Slewing , Luffing & Standard Cradle

Ladders and Travelling Gantries

Solutions for inside and external maintenance of glazed structures such as domes, atriums and buildings with panoramic views. All mobile gantries are made from profiled aluminium, which can be coated or anodised depending on the customers requirements.

Manual

Motorized

Monorail

An ideal system for integrating into metal structures and curtainwall facades, as it blends perfectly with the building. The monorails are made of aluminium alloy and may be supplied plain or anodised. They can be formed both vertically and horizontally to fully integrate with the facades. All monorails can be fitted with manual or powered trolleys which are easy to operate in complete safety.

Type 1 : Horizontal Trolley - 2m Cradle

Monorails: Aluminium
Support Bracket:
Steel To EN 10025 Gr.2
Support Bracket Surface Finish:
Hot Dip Galvanized to Bs EN ISO 1461

TECHINCAL DATA

SAFE WORKING LOAD : 240 KG

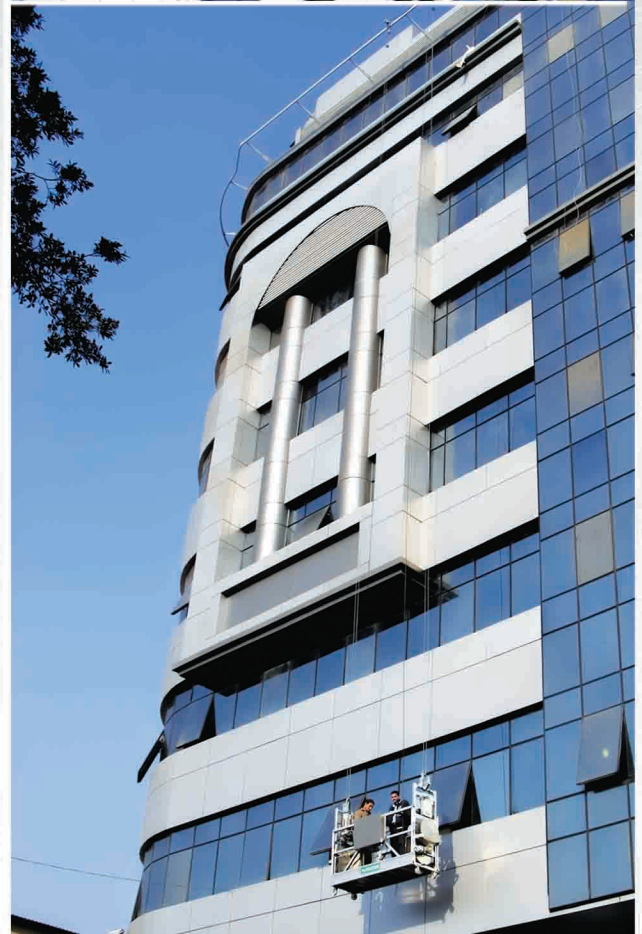

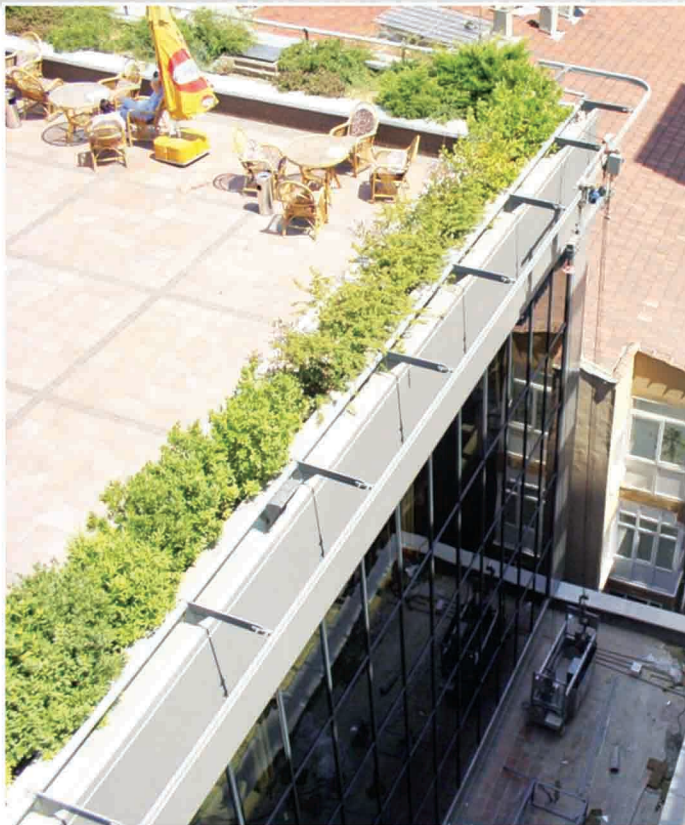

SPEEDS

LIFTING : 8 TO 10 M/MIN

TRAVELING : 6 M/MIN

POWER SUPPLY

380 V--3PH--50HZ + EARTH & NETRAL

Mob : 0122 1351 915 - 0155 5986 690

Type 2 : Vertical Trolley - Solo Cradle . SWL=150 kg

The **vertical trolley** is a unique type of monorail system with the ability to climb on a special track, even vertically. It can travel through curves with radius of 450 mm and can be erected almost anywhere. All you need is a place to fix the brackets. With the vertical trolley you can solve different access problems.

DAVITS

Fixed Davits are an economic and simple solution, with **powered platform suspended to two Davits.**

Advantages:

- ☒ **Cradle length from 2 m up to 12 m**
- ☒ **Low installation cost.**
- ☒ **Lightweight and easy to move on the roof.**
- ☒ **No excess equipment on the roof.**
- ☒ **System can easily be dismantled when not in use.**

Fixed Base - Movable Arm - Cradle

Fixed Base & Arms :

Steel To EN 10025 Gr.2

Hot Dip Galvanized to Bs EN ISO 1461
